IT with care.

waveware®

The integrated software solution for facility management

waveware®

waveware® is an integrated software solution for computer-aided facility management (CAFM) and maintenance that can be tailored to your individual requirements. Its modular structure, featuring as many task areas as you need, allows you to tailor the setup of the software to your requirements in facility management, maintenance, medical technology, materials management and many other areas.

waveware® helps facility management achieve company goals, meet key performance indicator targets, adhere to laws and regulations, and mitigate or prevent risk scenarios.

x-tention is a system partner of software manufacturer Loy & Hutz, combining decades of experience in developing facility management software with the comprehensive expertise of a leading IT solutions provider in the health and social care sector.

Flexible combinations

You can choose from an extensive collection of software enhancements to match your preferences and requirements. The modular approach means that you only implement the software packages that you actually require for your daily work processes.

There are numerous sector and application-specific packages, each of which can be tailored to your needs and requirements. These include: property management, facility management, area management, error message management and maintenance management in facility, building and medical technology systems, as well as the maintenance of industrial and production plants and lots more.

COMPONENTS & PACKAGES

# Overview – how the components work together

Enhancement packages

These supplement the system packages included in the standard waveware® software. With over 60 enhancement packages to choose from, you can select the exact ones that you need for your daily work processes.

System

waveware® SYSTEM is the central element that controls the interplay between enhancement packages, database and clients. The system contains all tables and functions that database programs need.

Client types

waveware® is available in various client versions. Whether you want to use your PC, laptop or mobile devices such as smartphones and tablets, we provide the ideal platform.

waveware® FAT

waveware® Windows® client for installing locally on PCs and laptops. Even the standard version of the software includes numerous system functions.

WAVEWARE® WEB

The web client uses HTML5 to take the CAFM software online. It is structured almost identically to the FAT client so it will feel familiar immediately.

WAVEWARE® MOBILE

The MOBILE client allows you to use waveware® easily on smartphones and tablets (Android, iOS or Windows) with an app.

WAVEWARE® COMPACT

The stripped-back web client makes basic waveware® functions and processes easier to use for large numbers of users.

WAVEWARE® NETPROCESS

The software displays processes on an ASP web interface that has been tailored to customer requirements. It is suitable for large numbers of users and can be used immediately without training.

waveware®
SYSTEM

Optional tools

You can use the interface designer (waveware® DESIGNER) and system-building kit (waveware® CONSTRUCTOR) to customize the software's interface and processes.

waveware® DESIGNER

Design the software interface that suits you. You can move fields or create new ones with no programming required – simply customize the interface using drag and drop.

waveware® CONSTRUCTOR

Adjust processes or create completely new ones, with no programming required. Over 1,600 predefined software modules allow you to customize quickly using drag and drop functionality.

waveware® – standard package

Right from the beginning waveware® includes numerous functions and system applications that help you perform your daily tasks.

- Address management
- User rights and roles
- Order management
- Evaluation and analysis
- Back-up and restore functions
- CSV interfaces
- Database
- Data export
- Data import

- Data restrictions
- Document management
- Favourites
- Form generator
- FM basic catalogues
- Validities
- Calendar
- Index card system
- Catalogue system
- Cost catalogues
- List generator
- Simultaneous editing of multiple data records

- Multitasking
- Navigator
- Password management
- PDF compatible
- Personnel management
- Quick search
- Service coordinator
- Recurring appointments
- Software architecture
- History
- Zoom

waveware® – enhancement packages

You can use waveware® modular enhancement packages to design and continually enhance your own individual CAFM software solution.

The software's modular structure allows you to customize it to meet requirements in facility management, maintenance, medical technology, materials management and many other areas. You can combine the versatile enhancement packages with each other and enhance them as much as you like, even in the live system.

'We use waveware® from Loy & Hutz to design tailored solutions for maintenance and facility management in your organization. waveware® is agile and can be seamlessly integrated into existing ERP systems such as SAP, plus you can enhance it as you wish. We implement your requirements using the waveware® construction kit and/or proprietary x-tention developments. With our CAFM there's no such word as can't.'

Benefits

- **Highly flexible**
  waveware® guarantees maximum flexibility and customization. You can customize both the software interface and the software processes.

- **Graphical tools**
  waveware® uses only graphical tools for developing and adjusting the software, which makes it even easier to use and simpler to adjust to individual wishes and requirements. Dashboards display each user's key evaluations and statistics as visuals so they can keep track of their most important key performance indicators.

- **Ideal for every kind of client**
  Whether you are using a PC, laptop or mobile devices such as smartphones and tablets, the waveware® platform is suited to every kind of client.

- **Device manager**
  waveware® allows hospital operators and healthcare institutions to manage their medical technology professionally, fulfils all requirements of the German Medical Devices Act (MPG) and Medical Device Operator Ordinance (MPBetreibV) and allows you to enter and evaluate technical, legal (e.g. risk categories) and economic data for an object.

- **Fully integrated solution**
  As an SAP partner of many years, x-tention has the experience and expertise to handle standardized communication between waveware® and the ERP system.

- **Transfer of existing data**

- **Compliant with legal requirements**
  A unique and user-friendly integrated statistics module allows you to query, evaluate and report on data in a matter of seconds. That guarantees that data is available quickly in the event of an audit.

- **Granularity of all data**
  All facility management sub-processes are integrated and mapped on a single platform. The sector and application-specific packages in addition to the modular structure allow you to easily adjust the software to your actual needs. This means that you can react quickly and easily when business processes change or new requirements are added.

- **Ticket system for error messages**
